

EQ Insurance receives “Business Continuity Management” certification

To prepare ourselves to handle any crises, EQ Insurance went on an educational journey to be certified by BSI for the Business Continuity Management SS540 in December 2009. The project was coordinated by our IT Manager, Harry Wang and supported by Business Continuity Plan (BCP) Asia, so that we can deal with disruptions to our operations and still continue with our business. All Managers were subjected to an audit of their understanding & response during a crises pertaining to their respective departments. EQ Insurance is one of the very few General Insurance companies in Singapore to have the certification, which adds credibility and instilled confidence on our Business Partners.
